AMC CAST-IT Team Resolves Delays for DLA Aviation Cast Spare Parts

The Defense Logistics Agency (DLA) Aviation Forging and Casting Assistance Team (AFCAT) and AMC's CAST-IT Team were notified by the Oklahoma City Air Logistics Complex (OC-ALC) Material Manager of an issue that an OEM was having in supplying cast parts on aircraft engine control unit fans. CAST-IT determined that these delays were affecting weapon system readiness for both the B-2 and C-5 weapon systems and teamed with the OEM and the Weapon System Program Manager to resolve the issues by locating tooling and identifying capable casting sources. As a future project, CAST-IT plans to bring multiple divisions within DLA/DoD together for the purpose of proactively identifying casting-related delays.

AMC
