AMC Holds Successful 2025 Technology Review

The AMC Technology Review was held June 11-12, 2025, at the Hilton Garden Inn – O’Hare, Des Plaines, Illinois. The event was “hybrid,” allowing remote attendees to join the live presentations and ask questions. During this two-day event, AMC’s Emergent Metal Casting Solutions (EMCS) project teams presented their R&D results to over 50 program and research leaders from industry, academia and government. Each project team presented their progress to date as well as future plans and how the results will be transitioned into the casting industry to support DoD’s need for rapid production of high-performance, cost-effective cast parts for weapons systems.

2025 AFS CastExpo

AMC exhibited at the AFS CastExpo, April 12-15, 2025, in Atlanta, Georgia. Approximately 4,700 people attended this premier event with more than 380 exhibitors. Attendees benefited from technical presentations, networking and informational exhibits to improve business performance.

Upcoming Events

2025 NADCA Die Casting Congress & Tabletop

AMC will exhibit at the NADCA Die Casting Congress & Tabletop, October 7-9, 2025, in Milwaukee, Wisconsin. In addition to exhibiting, several AMC projects will be presented during the technical sessions that take place during this event. Come see us in booth 346!

2025 Defense Manufacturing Conference

AMC will be supporting DLA in their booth at the 2025 Defense Manufacturing Conference, November 17-20, 2025, at the Caribe Royale Orlando in Orlando, Florida. DMC is the nation’s annual forum for enhancing and leveraging the efforts of technology leaders, scientists and policy makers across the defense manufacturing industrial base.
